Program Manager, Learning Science
Location: Austin, TX, preferred; other locations considered

About Deans for Impact

The mission of Deans for Impact is to ensure every child is taught by a well-prepared teacher. We do this by bringing together leaders of educator-preparation programs who want to change the way they prepare beginning teachers; helping these leaders transform their programs through evidence, including our best scientific understanding about how students learn; supporting them to sustain changes over time; and building their capacity to influence policy.

Our Values

At Deans for Impact, we believe that a great workplace is one where you are inspired by your colleagues, and deeply engaged in your work every day. Six core values guide our work:

- **Model professionalism** – We seek out feedback and foster growth through honesty and humility.
- **Be good stewards** – We care deeply about our culture, and everyone is expected to positively nurture its growth and evolution.
- **Practice good pedagogy** – We create learning environments where all voices are heard; gather evidence to inform our decisions; and design activities with the end in mind.
- **Always seek solutions** – We are nimble in developing solutions to problems and testing them, and then we iterate based on what we’ve learned.
- **Design for inclusivity** – We take deliberate steps to foster inclusivity in everything we do, from hiring to program design to identifying leaders to collaborate with.
- **Transform the system** – We take risks to create transformative change, and we’re not afraid to fail.

The role of Program Manager at Deans for Impact

Deans for Impact works closely with teams from educator-preparation programs to transform how they prepare future teachers. In 2020, Deans for Impact will launch a new national network to support programs in preparing novice teachers to use our best scientific understanding of how children learn to ground their instructional decisions. Building off Deans for Impact’s *The Science of Learning* publication and *Learning by Scientific Design* network, this new initiative will enable Deans for Impact to work with a new group of programs that want to anchor teacher preparation in learning science principles. We are looking for a talented Program Manager to help make this happen.

Our Program Manager will focus on designing and delivering learning sessions and providing individualized coaching to support faculty as they develop a new arc of experiences for teacher-candidates. The Program Manager will also develop and maintain processes to ensure the smooth operation of the network.
Responsibilities

The Program Manager will be responsible for:

- Designing and delivering in-person and virtual learning experiences to support faculty in building understanding of cognitive science – both their own and that of the candidates they prepare.
- Supporting program teams through ongoing coaching to develop a redesigned arc of experiences for teacher-candidates and overcome challenges in the implementation of these experiences.
- Actively building and sustaining positive, productive relationships with network participants.
- Managing the day-to-day work of the network, including managing a workplan, coordinating communications with network participants, and sharing learnings across the network.
- Collecting and analyzing data to ensure that the network is on track to achieve its goals.

Desired Qualifications

We understand that people gain skills through a variety of professional, personal, educational, and volunteer experiences. We encourage candidates to review the key responsibilities and qualifications below. If you believe you have the transferable skills necessary to fulfill the responsibilities of this role, we encourage you to apply. We will consider candidates with greater seniority and are open-minded about adjusting the role to match experience level.

- **Experience:**
  - You have at least six years of professional work experience, at least three of which were spent designing and leading sessions for adult learners.
  - You have some experience developing teachers.
  - You have some experience managing complex projects.
  - You have a demonstrated interest in principles of cognitive science.
  - You have a strong track record of using data and evidence to drive improvement.
  - If you have worked with teacher-preparation programs, that’s a plus.

- **Skills and qualities:**
  - You are an effective facilitator and coach of adult learners.
  - You can identify high-quality instruction, and design learning experiences to support others’ understanding of high-quality instruction.
  - You are keenly interested in how to facilitate team, organizational, and network learning.
  - You can prioritize work in a dynamic, project-based environment, take on multiple tasks simultaneously, manage time effectively, and deliver high-quality work on time.
  - You listen carefully, and think about how your history and experiences influence your perceptions.
  - You take initiative, anticipate challenges, and proactively pursue solutions to problems ranging from the mundane to the complex.
  - You recognize the connection between historical injustices and present-day inequities in education – and want to help remedy them.
How to Apply

Please visit http://bit.ly/DFICareers to submit your application for the Program Manager position.

If you have any questions, please reach out to careers@deansforimpact.org. We will start screening candidates immediately and will continue until we find the right person. Deans for Impact attracts top talent, and we offer competitive wages and benefits.
